

COLUMBIA UNIVERSITY

ColumbiaDoctors | Surgery

*College of Physicians
and Surgeons*

Dear all,

October was a banner month for research in the Department. Many thanks to Henry Spotnitz and the team that reviewed the 47 research grant applications that were submitted, and to all the faculty who continue to devote their time to teaching and mentoring. The enthusiastic (and growing) participation in this program reflects our priority on teaching and promoting research in the department, and we thank all who have made it so successful.

Thank you as well for your continued participation in this monthly e-newsletter. In case you may not be aware, all issues of this [newsletter](#) are now available on the Center for Innovations and Outcomes Research web site for easy reference. Please continue to email Paul Kurlansky (pk2245@columbia.edu) or myself (crs2@cumc.columbia.edu) with your confirmed publications, presentations, and grants for our upcoming issues.

As a reminder, the PubMed links below should work for everyone. The journal-specific links will only work if you have a subscription to that journal or you are connected into the Columbia University library e-journal system.

Best regards,
Craig Smith, MD

CONGRATULATIONS

Congratulations to Dr. Matthew Bacchetta on a groundbreaking publication in the Proceedings of the National Academy of Sciences regarding novel method for pulmonary drug delivery (See Thoracic Surgery Publications).

Congratulations to our new faculty member Dr. Kazuhiko Yamada on two recent NIH grant awards:

1. 1R01DK105503-01A1 (Moore/Yamada. MP) 07/01/15 – 05/31/20
siRNA Protection of Islet Grafts in Baboons
The overall goal of determine effects of siRNA protection of islets in autologous and allogeneic barriers in a non-human primate.

Direct Costs Awarded: \$305,389 (2015)

07/01/15 – 05/31/20

Role: PI

2. 1R01DK105468-01A1 (Moore/Yamada, MP) 07/01/15 – 05/31/20

siRNA Protection of Composite Islet Kidney Transplant in Baboons

The overall goal of determine effects of siRNA protection of islets of composite islet kidneys (IK) in baboons to reduce amount of excision of donor pancreas to apply the composite IK strategy for clinical living related islets and kidney transplantation.

Direct Costs Awarded: \$351,085 (2015)

Role: PI

Congratulations to Dr. Isaac George on receiving the Ninth Annual Kenneth A. Forde Surgical Research Award (\$10,000) for work with Nat Langer on the role of myostatin in heart failure.

Congratulations to Dr. Dustin Carpenter, working with Dr. Donna Farber on receiving the fourth annual John Jones Award. (\$3,000). Dustin will present the findings of his research to the John Jones Surgical Society this coming spring.

Congratulations to Drs. Elisabet Tomas, working with Drs. Frank D'Ovidio and Hiroo Takayama, and to Dr. Scott Chicotka working with Dr. Matthew Bacchetta, on receiving the Michael Treat Awards (\$2500 each) for technological innovations in surgery.

Congratulations to all of the 28 recipients of the Department of Surgery Start-Up Grants listed below—this year there were are record number 47 applications, so clearly the interest in research is strong within the Department!

Investigator	Attending	Title	Startup Grants	Forde, Treat, JJSS
Paula Alonso-Guallart	Adam Griesemer, MD	Bone Marrow and Amnion-Derived Multipotent Progenitor Cells for Promotion of Durable Mixed Hematopoietic Chimerism and Immune Tolerance in a Non-Human Primate Model	\$7,150	
Debarshi Banerjee, PhD	A. Kadenhe-Chiweshe, MD	Enhancement of anti-tumor effects of radiotherapy by ATF5 inhibition	\$5,900	
Shunpei Okochi, MD	A. Kadenhe-Chiweshe, MD	The effect of checkpoint inhibition using PD-1 blockade in experimental neuroblastoma	\$5,500	
Jeffrey Stern, MD	Tomoaki Kato, MD	Combined Bone Marrow and Liver Transplantation in Cynomolgus Monkeys: Induction of Allograft Tolerance and Mixed Chimerism Through Enhanced Memory Cell Depletion	\$5,400	

Neranjan de Silva	Xiaojuan Chen MD-PhD	Islet cell type identification and purification using the novel SmartFlare RNA Detection technology	\$5,400
