

A Healthier Leg to Stand On

FREE Vein Screening

- **Do you have visible bulging varicose veins?**
- **Do you have spider veins?**
- **Have you had blood clots?**

Varicose veins are not always a cosmetic issue. If left untreated, they could result in more serious problems. We are offering FREE vein screenings where you will have an opportunity to meet with a physician, have a brief examination and to ask questions.

Screenings take less than ten minutes and are open to men and women. Participants are examined individually in a private environment and should wear loose-fitting clothing.
