ColumbiaHeartSource

Join Columbia HeartSource as we celebrate our 10th Annual Network Day. This one-day symposium is designed to provide strategies for clinicians and administrators to build an effective, innovative and quality cardiovascular service line in this rapidly evolving healthcare environment. The program will provide a comprehensive review of evolving specialties, emphasizing the significant technological innovations in the treatment of advanced cardiovascular, valvular and structural heart disease.

The program offers administrative, financial and clinical topics with an emphasis on enhancing your ability to provide quality-driven care throughout your cardiovascular service line. Lectures will be given in a multidisciplinary format by nationally and internationally recognized experts and leaders.

PROGRAM OVERVIEW

EDUCATIONAL OBJECTIVES

- Understand how quality and outcomes data are being used to improve patient care, and how integration of clinical and financial data can enhance operational efficiencies and quantify quality
- Identify new techniques and technologies in the cardiac surgery sphere
- Identify which programs are best suited for your institutions and patient population to enhance your existing service line, and how multidisciplinary teams can help manage your patients
