NY, NY 10002

Contact: arl2005@med.cornell.edu

TAKE AN ACTIVE APPROACH TO MANAGE YOUR VIRAL HEPATITIS INFECTION.

Topics for discussion:

- Viral Hepatitis Awareness and Education
- Learning and Sharing Personal Experiences and Issues

Who should attend:

Patients, family, friends and care givers interested in learning and sharing experiences about viral hepatitis. All are welcome to participate in this free support group. The support group will be facilitated by a Gastroenterology and Hepatology Specialist, General Practitioner (GP), Physician Assistance(PA), Nurse Practitioner(NP), Nurse, Social Worker, or Patient Advocate.

Here are some important facts:

- Viral hepatitis is not genetic, but caused by a virus.
- There is a simple blood test to diagnose viral hepatitis.
- Hepatitis C can be cured.
- Hepatitis B can be treated to prevent worsening of the disease.
- There are a number of excellent treatment options available today for Hepatitis B.

Please contact your friends, family and other people in the community to share this information.
